The advantage of post-cooking application

The Nobileverde Squeeze bottle allows precise application immediately after cooking, preserving the aroma, texture and quality of the pistachios.

HYGIENE AND PRECISION

Controlled dispensing with no waste. The product is not exposed to external contamination.

SPEED

Practical and fast: always ready to use.

BETTER FLAVOUR

Applying it cold enhances the authentic flavour and freshness of the pistachios.

BETTER HEALTH, BETTER QUALITY

Use after cooking avoids exposing the oil to high temperatures, reducing the formation of toxins, acrylamide and free radicals that are harmful to cells.

Post-cooking application prevents aroma changes caused by high oven temperatures.
